Plotting an Image in MATLAB

Using MATLAB's imread() function, I can graph a jpg or png of my choice, then display it using image().

```
A = imread("space.jpg")
```

```
A = 1024×1280×3 uint8 array
A(:,:,1) =

   41    37    24    11     7     9    10    10    23    16    26    34    28    37    45    39    15    27    29
    :
    :
```

```
image(A)
```
